

It Can Be Easy to Put On A Mammography Seminar!

If Your Facility Hosts a Seminar It May Provide Free CE's For Your Staff

LESS IS MORE

Why travel to attend a seminar when you can have one in-house that is easy to set-up and lets you design the seminar to meet your needs? Look for a speaker with enough materials to speak for several hours. This can cut back on the workload of coordinating multiple speakers and on the base expenses, **often allowing your staff to attend for free at the host site.**

ENTHUSIASM IS CATCHING

Listen to the speaker when interviewing them - how long would YOU want to listen to them? What is their style? Knowledgeable of course, but don't forget the value of an upbeat tempo, a caring attitude, and an enthusiastic approach to their profession and your seminar.

CHOOSE A PROFESSIONAL

Discuss your objectives and work as a team - tailor the seminar to your participants. A variety of subjects will enhance the experience and an experienced speaker can provide insight into popular lectures.

TIMING IS EVERYTHING

Putting on a seminar is like a pregnancy - think months in advance.
Project dates, design, and confirm your seminar NOW!

**MAKE YOUR SEMINAR EASY,
POSSIBLY FREE TO YOUR STAFF
AND A GUARANTEED SUCCESS!**
